

Wizard Tenon

Tenoning machine for windows and door frames

forwards

backwards

Special program for a tenon pre-cut produces tear-free stormproof sashes or presquared components for knock-down frames.

Wizard Tenon

Tenoning machine for windows and doors with a forwards-backwards working cycle

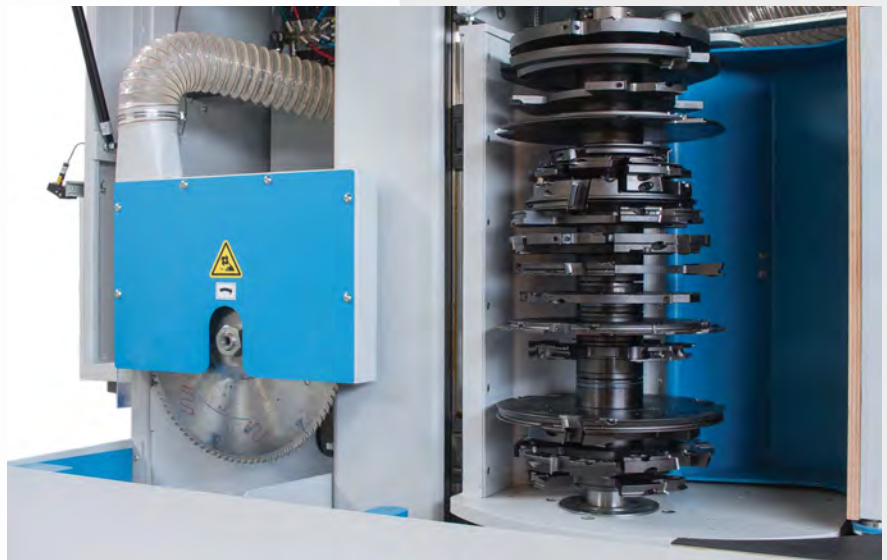

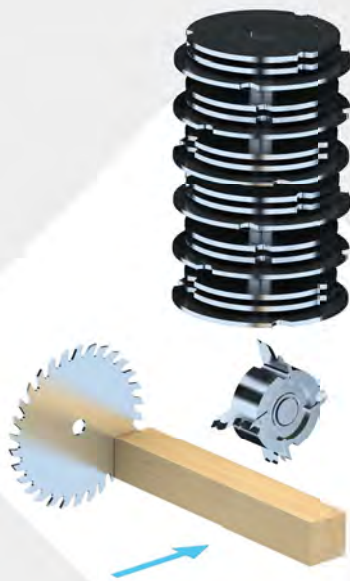

The creation of window components to be machined begins in WinCreator and then they are sent to the machine. The length of pieces, position of a cut-off saw and working tools are set automatically in the working cycle.

Innovative change system for tenoning tools

Chip breaking device for tenoning

- industrial PC with screen 12"
- cut-off saw Ø 400 mm, motor 4 HP (3kW)
- tenoning carriage for tilting +/- 60°
- fence with electronic measuring system
- tenoning unit L = 620 mm, motor 16 HP (11,2 kW), rpm 3000, max tool diameter 320 mm
- horizontal unit motor 5,5 HP (4,5kW) for sash horn moulding (optional)

Horizontal milling unit for heritage sash horn detail - optional
